

The Institute for Educational Studies (TIES) Presents:

EDUCATING IN THE ECOZOIC

Online Conference

January 21 – February 7

17 Presenters, 17 Days

TIES has been a pioneer in dialogue-based online education since 1993

Earth is a one-time
endowment.

–Thomas Berry

The conference-symposium recognizes the contributions of many who share the vision for a sustainable planet. In particular, we recognize the contributions of 20th century mystics, Maria Montessori and Thomas Berry. Thomas Berry's call for a New Earth Community and Maria Montessori's vision for the New Human, both emanate from the belief that education is the only reliable way forward to change the current paradigm.

During this 17-day event, presenters share their ideas on how to nurture the seeds for an Earth recovery. The possibilities are here; our actions today will create the future tomorrow.

Questions participants can explore include:

- What contexts lead to a deeper understanding of humanity's relationship to the natural systems that sustain us?
- In what ways does integrative learning seamlessly weave content and process?
- How is heart wisdom and creativity expressed in the teaching-learning environment?
- In what ways does the practice of dialogue empower participants in a learning community?
